Hubblecast Episode 85: Ode to Hubble	Visual notes
<p>00:00 [Narrator] 1. On the 24 April 2015 Hubble celebrated 25 years in orbit, and the world celebrated with it.</p> <p>As part of the global celebrations ESA/Hubble launched the Ode to Hubble video competition, and the results were remarkable.</p>	
<p>00:35 2. Intro</p>	

01:00

[Dr J]

3. To celebrate the public contribution to the Hubble mission, the Ode to Hubble competition encouraged people across the globe to produce creative video pieces and highlight how Hubble had inspired them.

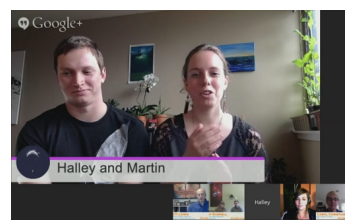

In the “born in Hubble’s lifetime” category, for those 25 years old and younger, the winners were Halley Davies and Martin Hellmich. And here they are to talk about their winning video!

01:26

[Halley Davies and Martin Hellmich]

4. Our video has some stop motion to it, we have photos that Hubble took and it basically goes through how we started seeing the stars from the ground, but we couldn’t get up there, we were only able to paint. And how, through science, and through Hubble, eventually step by step we were able to actually have eyes in space to see the Universe.

01:57

[Text below is written in video]

5. Video created as part of the Ode to Hubble Competition in celebration of Hubble’s 25th year in orbit.

03:50 Ultra Deep Field

03:52 10 000 galaxies.

03:56 Everything we can see!

04:02 100 000 000 000 (100 billion) galaxies (at least!)

04:07 If you hold your hand up...

04:13 That is over half a billion galaxies. Behind your hand!

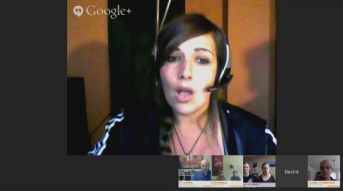

04:18 Imagine all of the amazing places out there...

04:23 Hubble has opened our eyes to how much there is to explore.

04:27 Thank you Hubble for taking us on an adventure through the Universe.

04:38 Inspired by the Deep Field Images that broadened our perspective of the Universe. Similar to when Galileo first looked through his telescope, we

<p>discovered the unimaginable.</p>	
<p>04:42 [Dr J] 6. The winner of the second category, for the over 25s, created a very different Ode.</p> <p>Desiré de Palacio combined images of the Universe with her own photography of our planet and the human form to show how Hubble has inspired her.</p>	
<p>05:00 [Desiré de Palacio] 7. My video is divided into two parts. In the first part I make a little reflection on the way that Hubble discoveries have inspired me. And, in the second part, I show a sequence of my own creation of photographs that were inspired by Hubble images.</p>	
<p>05:30 [Text below is written in video] 8. Video created as part of the Ode to Hubble Competition in celebration of Hubble's 25th year in orbit.</p> <p>05:42 What does Hubble mean to you? 05:53 The Universe was a cold and hostile place. 05:99 Laps in the dark are always a challenge, to face our fears. 06:10 We create our own light. 06:15 Just to discover our deepest self. 06:21 A long lasting task. 06:27 How could we stop gazing at the stars for so long? 06:37 Thanks to Hubble we have done it again. 06:44 With its gaze, this gap has been filled 06:47 And now I feel the Universe 06:50 as home. 06:55 Barionica 06:58 How has Hubble inspired you?</p>	
<p>08:18</p>	

[Narrator]

9. The powerful videos created for the competition are a testament to Hubble and to the artists, space enthusiasts and astronomers it has inspired over the last quarter of a century.

The shortlist, and the entries that were not chosen, include many more videos well worth watching. Take a look and explore the realms of creativity, hours of hard work and the unique takes on what an Ode to Hubble might look like.
